

Experiment 6

Lab Tasks

1. Restyle your Experiment-5 personal website completely: external CSS, brand colours (teal #028090 / mint #02C39A), styled navbar (flex), hero section, and card-based projects section (grid).
2. Recreate a pricing table (3 plans side by side, middle one highlighted) using Flexbox — include hover lift effect.
3. Build a 'holy grail' page layout with Grid: header, left sidebar, main, right aside, footer (grid-template-areas).
4. Make the pricing table responsive: 3 columns desktop → 1 column stacked on mobile using a media query.
5. Play flexboxfroggy.com to level 15+ and cssgridgarden.com to level 10+; screenshot both.

Restyle your Experiment-5 personal website completely: external CSS, brand colours (teal #028090 / mint #02C39A), styled navbar (flex), hero section, and card-based projects section (grid).

Recreate a pricing table (3 plans side by side, middle one highlighted) using Flexbox — include hover lift effect.

Build a 'holy grail' page layout with Grid: header, left sidebar, main, right aside, footer (grid-template-areas).

Another property you can apply to individual items is **align-self**. This property accepts the same values as **align-items** and its value for the specific item.

```

1 #pond {
2   display: flex;
3   align-items: flex-start;
4 }
5
6 .yellow {
7   align-self: flex-end;
8 }
9
10

```
