

Experiment 5

Lab Tasks

1. Build a 3-page personal website (index.html, projects.html, contact.html) with a consistent semantic layout and working nav links between all pages.
2. Create a 'Class Timetable' page using <table> with days as columns, periods as rows, <th> headers, and a caption.
3. Build a complete 'M-Tech Internship Application Form': name, email, phone (tel), CNIC (pattern attribute!), date of birth, gender (radio), 3+ skills (checkboxes), domain (select), motivation (textarea), file upload for CV, and submit/reset buttons — with full validation.
4. Research 5 HTML entities beyond & and © and demonstrate them on a page.
5. Take any real website's homepage and sketch which semantic tags YOU would use to rebuild its layout (labelled diagram).

Build a 3-page personal website (index.html, projects.html, contact.html) with a consistent semantic layout and working nav links between all pages.

About Me

Hello! I am an Artificial Intelligence student passionate about building full-stack web applications, exploring localized AI agent workflows, and solving real-world technical problems.

Core Skills

- Languages:** Python, JavaScript (ES6+), C++, SQL
- Web & Back-End:** Flask, HTML5, CSS3, Node.js
- Tools & Platforms:** Git, GitHub, MySQL, VS Code

Create a 'Class Timetable' page using (table) with days as columns, periods as rows, headers, and a caption.

127.0.0.1:5500/timetable.html

Department of AI - Weekly Class Timetable

Time / Period	Monday	Tuesday	Wednesday	Thursday	Friday
Period 1 (09:00 - 10:00)	Web Development Lab	Operating Systems	Database Systems	Machine Learning	Artificial Intelligence
Period 2 (10:00 - 11:00)	Web Development Lab	Software Engineering	Database Systems Lab	Machine Learning Lab	AI Ethics
Period 3 (11:00 - 12:00)	LUNCH & PRAYER BREAK				
Period 4 (12:00 - 01:00)	Software Engineering	Linear Algebra	Probability & Stats	Project Work	German Language

Build a complete 'M-Tech Internship Application Form': name, email, phone (tel), CNIC (pattern attribute!), date of birth, gender (radio), 3+ skills (checkboxes), domain (select), motivation (textarea), file upload for CV, and submit/reset buttons — with full validation.

M-Tech Internship Application Form

Full Name:

Email Address:

Phone Number:

CNIC Number (Format: 13301-1234567-1):

Date of Birth:
 📅

Gender:
☐ Male ☐ Female ☐ Other

Select Your Skills (At least 1 required):
☐ Python
☐ JavaScript
☐ SQL / Databases
☐ Flask / Web Frameworks

Preferred Domain:

Statement of Motivation:

Upload CV (PDF/DOCX):
 No file chosen

Research 5 HTML entities beyond & and © and demonstrate them on a page.

HTML Special Character Entities Demonstration

1. **Less Than:** Use < to render < (e.g., <div>)
2. **Greater Than:** Use > to render > (e.g., 5 > 3)
3. **Trademark:** Use ™ to render ™ (e.g., M-Tech™)
4. **Registered Trademark:** Use ® to render ® (e.g., Python®)
5. **Infinity:** Use ∞ to render ∞ (e.g., Knowledge is ∞)

Entity Summary Table

Entity Name	Code / Notation	Output Symbol	Common Usage / Purpose
Less Than	<	<	Prevents the browser from misinterpreting raw < as an HTML opening tag.
Greater Than	>	>	Prevents raw > from conflicting with HTML tag closing brackets.
Trademark	™	™	Displays the unregistered trademark brand symbol.
Registered Trademark	®	®	Displays official registered product or brand trademark status.
Infinity Symbol	∞	∞	Renders mathematical infinity signs in technical prose or formulas.

Take any real website's homepage and sketch which semantic tags YOU would use to rebuild its layout (labelled diagram).
